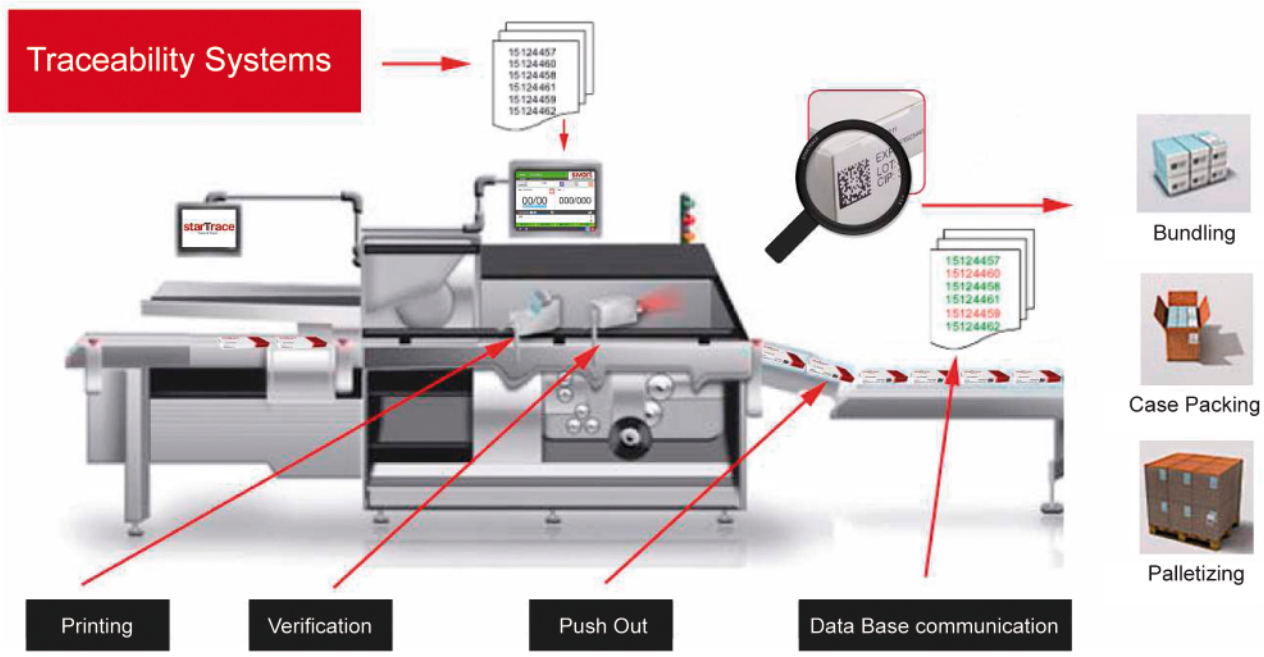
Global Traceability Solutions

SIVART, experienced in handling unit traceability in the Pharmaceutical, Perfumery, Cosmetics and Food Industry, has designed and developed the global hardware-software solution for compliance with all relevant standards and legislation, like: FMD (European), FDA (USA), ANVISA (Brazil)...



Complete monitoring solutions, Automation, Identification, Verification, Rejection, manual or automatic Packaging Systems and Unit Traceability Software:

- **Design of standardized or modular equipment incl. personalized installation**
  - Complete or modular solutions, adapted to existing equipment.
  - Communication with PLC of the any type of production line (Siemens, Omron, Allen Bradley, Schneider, etc.).
- **Hardware. Integration with multi-brand equipment:**
  - Marking equipment for unit serialization (Domino, VideoJet, Markem Image, HP, Macsa, Rea, Wolke, Hsausa, etc).
  - Reading and/or verification of barcodes and/or 2d codes (Microscan, LVS, Cognex, Sick, Datalogic, Leuze, Motorola, Honeywell, Ifm, etc).
  - Manual or automatic Printing of Unit/Pallet Labels (Zebra, Sato, Datamax, Toshiba, Intermec, etc).

- **starTrace Software**
  - In full compliance with existing worldwide laws, which regulate tracking and tracing concepts, adaptable to future legal requirements
  - Powerful display on one control monitor (user interface) for the entire traceability system and its equipment, easily understood by the operator / administrator.
  - starTrace , controls all equipment in the serialization process, right through to the rejection of the product in case of quality issues.
  - Flexible Database Management to ensure unit traceability at the level of bundler, box, pallet (Oracle, SQL.Server, etc.)
  - Communication with the customer's ERP (SAP, Navision, totvs.Infor, etc.)
  - Re-processing module to solve quality issues occurring after cartoning
  - SCADA Data Integration
  - Compliance with 21 CFR Part 11
